EDUCATION

University of Washington, Seattle

Bachelor of Science in Informatics: HCI Focus

GPA: 3.73 (Deans list 9 - Quarters) 2022 - 2025

Bellevue College, Bellevue

Associate's Degree: Arts & Sciences (Running Start)

GPA: 3.82 2018 - 2020

Relevant Coursework

Designing for Personal Health, Visual
Communication, Design Methods,
Design Systems, Value Sensitive Design

SCHOOL PROJECTS

[Burke Museum Kids @ UW INFO 462:](#)

UX Designer/Researcher

Mar 18, 2025 - June 15, 2025

- Designed a child-centered design system for the Burke Museum's digital experience, focusing on accessibility and engagement for younger audiences.
- Conducted user interviews, literature reviews, and market research to inform design decisions and ensure usability.
- Developed and implemented a comprehensive color palette adhering to WCAG AA standards, resulting in a 35% improvement in color contrast ratios across all Burke Museum digital interfaces.
- Created high-fidelity prototypes in Figma and developed use cases to guide implementation and design validation.

[Ocean Watch @ UW INFO 464:](#)

UX Designer

Jan 5, 2024 - Mar 15, 2024

- Designed a data visualization dashboard that helped track and reduce instances of illegal, unreported, and unregulated (IUU) fishing.
- Collaborated across roles in UX design, research, and project management to align design goals and technical feasibility.
- Delivered a polished, insight-driven report card prototype that highlighted the social and environmental impact of sustainable fishing practices.

SKILLS

Figma • UX Design • UX Research • Prototyping • Interaction Design •
Impeccable AI • Usability Testing • Visual hierarchy • Adobe XD • JavaScript •
Java • CSS • React.js • AI Design Implementation • Claude Design

WORK EXPERIENCE

[EAglobal.ai](#) Start Up

Intern Product Manager / UX Designer

Oct 14, 2025 - Current

- Supporting early design work for AI-driven internal tools, contributing wireframes, interface patterns, and initial Figma components.
- Collaborating with product managers and engineers to understand workflows and translate requirements into clear, usable designs.
- Helping design new foundational features that support upcoming product updates and ensure consistency across future releases.
- Developed AI console to help remove the mass amounts of design debt that was accumulated.
- Created a coherent design system and a designsystem.md
- Revamped the UI twice and continuing to iterate it based off current design trends and customer feedback.

University of Washington Seattle, WA

Teaching Assistant

Jan 5, 2024 - June 15, 2025

- Led weekly lab sections to reinforce Value Sensitive Design (VSD) concepts, guiding students through practical applications of ethical design theory.
- Provided detailed feedback on assignments and final projects, ensuring thoughtful evaluation of design quality and ethical considerations.
- Supported students in developing values-driven design processes by sharing real-world examples and facilitating class discussions.

[Recognize.app](#) B2B SaaS

Product Designer & UX Researcher

Jan 5, 2025 - June 15, 2025

- Collaborated in a small, cross-functional team of five—including two backend engineers and two frontend developers—to design and implement a data visualization HUD for a workplace recognition platform.
- Designed an interactive dashboard that transformed recognition data into clear, actionable visuals, improving how managers interpret employee engagement trends.
- Conducted end-to-end UX research—interviews, surveys, and usability tests—to identify user needs and uncover insights that guided both visual and technical design decisions.
- Partnered closely with frontend engineers to ensure visual consistency and design feasibility, translating Figma components into responsive, scalable UI elements.
- Led research on effective visualization types and proposed a new font system to improve readability and accessibility, which was later implemented across the company's platform.
- Presented final design deliverables to company leadership—including the CTO, CFO, and engineering leads—demonstrating measurable improvements in data comprehension and user experience.
